About us

Established in the year **1996**, We, 'Powerown Electronic Systems', are engaged in Manufacturing and Supplying a quality approved gamut of Power Back-up Devices & Automation. Manufactured using premium grade raw material, these products score high on Durability, Efficiency, Reliability and Dimensional Accuracy. We have established a sound and commodious infrastructure facility at our premises. It is managed by a team of highly laborious professionals, which holds relevant experience. Moreover, we have segregated it into various sub-sections, such that all the processes are executed in a systematic manner. The manufacturing facility is one of an integral departments of the infrastructure. Spread over vast moor of 2000 sq. feet, it has production capacity of 500 units/month. Further, timely delivery of the consignments is taken care of by the logistics personnel using our expansive distribution network. Relying on all these facilities, we have been able to capture the Indian market. We have been able to cater our clients in the best possible manner.

Home Automation

Home automation system is a system that controls by smart device using a mobile application. It can control the home appliances such as light, fans, air conditions, and smart security locks etc. Bluetooth or wi-fi technology will be used to control the things remotely

CCTV Systems

- Best way to protect your home & business
- Expert installer and provider of CCTV security systems.
- Monitor your premises with smart technology from wherever you are.

Automatic Rolling Shutters

Inverter & Battery

- Get the optimum functionality from your ups/inverter
- Latest Technology Tubular battery for longer life
- Advanced tubular plate technology
- Excellent overcharge technology
- Requires low maintenance
- Pure sine wave technology
- Protection: Input Undervoltage & Overvoltage, overload, short circuit, low battery alarm, over temperature.
- Advanced battery charger for improved battery performance

Solar Systems

- Available in Stainless Steel Inner & Outer tank with AI/SS structure
- Thick & Durable inner tanks to handle hard water
- Three layer coated high quality corrugated tubes
- PUF insulation 50 mm thickness

Water Level Controller

- Save.... Electricity, Water, Money, Time & Just Relax
- Tank Never gets empty prevents overflow
- Micro Computer based design
- Sensors all are food grade steel
- Manual bypass switch
- Protection to the pump Low voltage & high voltage cut off
- Can be used in any type of pumps
